### REASONS FOR ALLOWANCE

The claimed invention of a DC/DC converter is found to be allowable over the prior art since a DC/DC converter comprising switching means selectively controlled by one of at least three different discrete control voltages was not found to be singularly or collectively taught by the prior art. Additionally the claimed invention of a DC/DC converter is found to be allowable over the recently cited Japanese prior art since the Japanese prior art concerns DC/AC converters as illustrated in figure 5 of the reference and no motivation is found either singularly or collectively in the prior art as a whole to utilize the gate drive circuit for a switching element of a DC/AC converter as the gate drive circuit for a switching element of a DC/DC converter.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
